

Ricky S

☎ 84383 79160 | ✉ rickys4212@gmail.com | 💻 rickystech | 📍 Chennai, Tamil Nadu

Summary

Computer Science undergraduate focused on High-Performance Computing and GPU acceleration. Proven track record in real-time data processing through research-driven internships at C-DAC and infrastructure automation at Arich Infotech.

Education

St. Joseph's College of Engineering

B.E. in Computer Science and Engineering; CGPA: 7.68/10

Chennai, India

Sep 2024 – Present

Srimathi Sundaravalli Memorial School

Class XII (CBSE); 83% (Computer Science: 91%)

Chennai, India

April 2021 – March 2023

Technical Skills

Languages: C, C++, Python, Java, SQL, JavaScript, Tamil (Native), English (Fluent)

HPC & Systems: CUDA, Parallel Programming, Linux (Arch/Hyprland), Shell Scripting (Fish)

Developer Tools: Git/GitHub, VMware, MongoDB, MySQL, Docker, UiPath

Core Competencies: Data Structures & Algorithms, OOP, UI/UX Design, Infrastructure Automation

Professional Experience

Centre for Development of Advanced Computing (C-DAC)

Chennai, India

Project Intern

Dec 2025 – Jan 2026

- Implemented key use cases for "Zero Day Attack Detection on Streaming Log Data," processing over 1GB of logs per hour in a research-driven environment.
- Optimized log analysis workflows to reduce processing latency by 15%, meeting strict production timelines.

Arich Infotech

Perungudi, India

DevOps Intern

June 2025 – July 2025

- Provisioned and managed 10+ virtualized environments using VMware to simulate complex deployment and configuration workflows.
- Automated routine system tasks, reducing manual configuration time by 20% and improving operational efficiency within the team.

Technical Projects

GPU-Accelerated N-Body Gravity Simulator | CUDA C++, OpenGL, Dear ImGui

- Developed a real-time physics engine using CUDA C++ to simulate gravitational interactions for 50,000+ particles.
- Increased simulation throughput by 3x by implementing shared memory tiling, significantly reducing global memory latency.
- Engineered high-performance rendering via CUDA-OpenGL interop and custom GLSL shaders for real-time visualization.

Custom Linux Development Environment | Arch Linux, Hyprland, Lua

- Architected a high-performance Arch Linux system with the Hyprland tiling window manager and custom Fish shell scripts for optimized resource monitoring.
